OBJECTIVE

Software Engineer eager to focus on front-end web development and related client-server technologies. Self-motivated developer with a passion for product design. With a keen eye for details, proven experience, imagination and who sees solutions and challenges where others see problems. I am also an out of the box thinker, a disciplined and devoted worker and an individual that is good at sticking to deadlines.

TECHNICAL SKILL

JavaScript, React.JS, React-Native, Node.JS, Express.JS, HTML5, CSS3, Flexbox / Grid, Bootstrap 4, SQL, jQuery

EXPERIENCE

Freelance Software Engineer | Atlanta

07/13/2020 - Current

- Partnered with different individuals and companies and provided assistance in app and website development.
- Modelled and recommended technical designs after a thorough understanding of client requirements.
- Completed more than 10 projects on Upwork, Freelancer and Fiverr providing services like bug fixes for applications.

Realty Stream | Software Engineer Intern | <https://www.realtystream.com>

09/02/2020 - 12/30/2020

- Constructed a website from scratch and took care of the management and updating of about 20 pages for the same.
- Developed new features and updates for the website resulting in the overall increase of users by 75%.
- Facilitated development of next generation features and solutions while coordinating in a team of 10 people under the guidance of a senior engineer on an existing product team
- Sculptured modern frontend technologies (primarily React) and industry standard version control to perform quickly and worked on critical user facing product flows.

Global Paint Charity | Volunteer Web Developer | <https://www.globalpaints.org>

10/12/2020-12/18/2020

- Directed end-to-end tasks related to the website and collaborated on strategy, design, and setting up of integrations.
- Collaborated effectively with a team of 20 people including executive director, volunteer board and volunteer staff to design and deliver websites for projects.
- Ensured that complex solutions are made for high availability, scalability, security and supportability and delivered better user experience by 30%.
- Focused on technical skills such as API, CSS and HTML required to complete the project.

PROJECTS

Twitter Clone (Portfolio) <http://luisabad3210.github.io/twitter/>

06/06/2020 - 06/17/2020

- Designed and developed REST APIs in a microservices architecture with firebase and Google News API.
- Implemented independent reusable React components with call back functions, react hooks, and props.
- Created complex responsive interfaces with HTML, CSS, and JS from high fidelity designs and prototypes.

Facebook Clone (Portfolio) <http://luisabad3210.github.io/facebook/>

04/02/2020 - 04/20/2020

- Implementing performant and maintainable code for web UI using JavaScript / React / Node.
- Designing a responsive web and mobile experience using CSS flex-box and CSS grid.
- Executed new site features, fixed bugs, and writing improvements.

EDUCATION

DigitalCrafts | Buckhead | Software Engineering Bootcamp | 2019

- Handled projects individually and collaboratively with engineering mentors and instructors.
- Grasped the Javascript and technical concepts behind React.JS.
- Implemented and designed modern web applications using Full Stack web development frameworks.
