OBJECTIVE

Software Engineer eager to focus on front-end web development and client-server technologies. Self-motivated, passionate about product design, proven experience, and a problem solver, I strive to provide out of the box discussions and solutions.

TECHNICAL SKILL

JavaScript, React.JS, React-Native, Node.JS, Express.JS, HTML5, CSS3, Flexbox / Grid, Bootstrap 4, SQL, jQuery, Restful API, Agile Scrum Methodology

EXPERIENCE

American Red Cross | Software Engineer | Remote | https://www.redcross.org/   **01/11/ 2021 - Current**
- Refactoring and modernizing experimental application used by international teams.
- Collaborating with remote teammates using industry standard version control and deployment infrastructure like github.
- Research and design a mock wireframe for the existing websites interactions.
- Collaborated with remote teammates on weekly sprints to agree on engineering deliverables.
- Created the entire redesign of existing website using React (HTML5, CSS3).

Realty Stream | **Software Engineer Intern |** https://www.realtystreem.com   **09/02/2020 - 12/30/2020**
- Constructed the core website from scratch and managed approximately 20 high traffic pages.
- Developed new features and updates for the website resulting in the overall increase of *users by 75%.*
- Collaborated in a team of 10 people under the guidance of a senior engineer on an existing product team.
- Exposure to modern frontend technologies (primarily React) and industry standard version control to perform quickly and continuously work on critical user facing product flows.

Freelance Software Engineer | Atlanta   **07/13/2020 - Current**
- Partnered with different individuals and companies and provided assistance in app and website development.
- Modelled and recommended technical designs after a thorough understanding of client requirements.
- Completed more than 10 projects on Upwork, Freelancer and Fiverr providing services like bug fixes for applications.

Global Paint Charity | Volunteer Web Developer | https://www.globalpaints.org   **10/12/2020-12/18/2020**
- Directed end-to-end tasks related to the website and collaborated on strategy, design, and setting up of integrations.
- Collaborated effectively with a team of 20 people including executive director, volunteer board and volunteer staff to design and deliver websites for projects.
- Delivered faster *user experience by 30%.*

PROJECTS

Twitter Clone (Portfolio) http://luisabad3210.github.io/twitter/   **06/06/2020 - 06/17/2020**
- Designed and developed REST APIs in a microservices architecture with firebase and Google News API.
- Implemented independent reusable React components with call back functions, react hooks, and props.
- Created complex responsive interfaces with HTML, CSS, and JS from high fidelity designs and prototypes.

Facebook Clone (Portfolio) http://luisabad3210.github.io/facebook/   **04/02/2020 - 04/20/2020**
- Implementing performant and maintainable code for web UI using JavaScript / React / Node.
- Designing a responsive web and mobile experience using CSS flex-box and CSS grid.
- Executed new site features, fixed bugs, and writing improvements.

EDUCATION

DigitalCrafts | Buckhead | Software Engineering Bootcamp | 2019 | https://www.digitalcrafts.com
- Handled projects individually and collaboratively with engineering mentors and instructors.
- Grasped the Javascript and technical concepts behind React.JS.
- Implemented and designed modern web applications using Full Stack web development frameworks.
