**Atlanta, GA**                                                                                                          **Luis A. Abad**
http://luisabad3210.github.io/facebook/                                                                       678-365-6548
https://www.linkedin.com/in/luis-abad-a00180183/                                                luisabad3210@gmail.com

## OBJECTIVE

Software Engineer eager to focus on front-end web development and related client-server technologies. Self-motivated developer with a passion for product design. With a keen eye for details, proven experience, imagination and who sees solutions and challenges where others see problems. I am also an out of the box thinker, a disciplined and devoted worker and an individual that is good at sticking to deadlines.

## TECHNICAL SKILLS

JavaScript, React, Node, Express, HTML, CSS, Flexbox / Grid,  Bootstrap 4, SQL, jQuery

## EXPERIENCE

**Global Paint Charity** | **Atlanta** | **Software Engineer Intern** | https://www.globalpaints.org/                    **11/09/2020 - Current**
- Responsible for the end-to-end tasks and will collaborate on strategy, design, and setup of integrations, etc. with the unique opportunity to have an impact on the growth and process of the organization.
- Collaborate with the executive director, volunteer board and volunteer staff to design and deliver websites for complex projects.
- Ensure that solutions are designed for high availability, scalability, security and supportability.
- Act as a specialist focusing on the Squarespace platform with the ability to use API, CSS, HTML and any other tools, skills required to complete the project.
- Test and update the organization's website as needed.

**Realty Streem** | **Atlanta** | **Software Engineer Intern |** https://www.realtystreem.com                    **09/02/20120 - 12/30/2020**
- Responsible for designing, building, next-generation features, platforms and tools.
- Executed  solutions for  problems under the guidance of a senior engineer on an existing product team.
- Implemented modern frontend technologies (primarily React) and industry standard version control to iterate quickly and work on critical user facing product flows.

## PROJECTS

**Facebook Clone** (Portfolio) http://luisabad3210.github.io/facebook/                    **04/02/2020 - 04/20/2020**
- Implementing performant and maintainable code for web UI using JavaScript / React / Node
- Designing a responsive web and mobile experience using CSS flex-box and CSS grid
- Executed new site features, fixed bugs, and writing improvements.

**Twitter Clone** (Portfolio) http://luisabad3210.github.io/twitter/                    **06/06/2020 - 06/17/2020**
- Designed and developed REST APIs in a microservices architecture with firebase and Google News API
- Implemented independent reusable React components with call back functions, react hooks, and props
- Created complex responsive interfaces with HTML, CSS, and JS from high fidelity designs and prototypes

## EDUCATION

**DigitalCrafts** | **Buckhead** | **Software Engineering Bootcamp** |  **2019**
- Handled projects individually and collaboratively with engineering mentors and instructors.
- Grasped the Javascript and technical concepts behind React.JS.
- Implemented and designed modern web applications using Full Stack web development frameworks.

**Udemy** | **Online Classroom** | **2019**
- Deep dived into the  Javascript fundamentals behind React and Node.
- Reviewed advanced concepts such as closures, prototypal inheritance, IIFEs, and more.
- Mastered fundamental concepts behind structuring React applications and Node applications in modules.

**Udacity** | **Online Classroom** | **2018**
- Reviewed the fundamentals of JavaScript.
- Grasped the Javascript and technical concepts behind Node.JS.
